

Tisca Austria GmbH, Press Release

The magic of handwoven rugs A rug that's made according to your own ideas

Tisca Austria GmbH has been making handwoven rugs for half a century. Each is unique, with its own character, and each is different from all of the rugs that are made both before it and after it. It is distinguished by colours and designs, by its shape and size, and by the many thousands of quirks which together create a harmonious whole. Made by hand, it has slowly come into being, embodying the energy and skill of the weaver and paying testament to her care, her patience and her dedication.

Being able to design a rug according to your own ideas is a special experience. The customer defines the format and chooses the materials, the colours, the designs and the textures. An age-old form of craftsmanship is combined with modern design, and a personal interpretation of beauty and harmony provides interior spaces with a new face.

Tisca Austria GmbH is a manufacturer which has been making handwoven wool rugs for more than 50 years. The individual, custom-made rugs find their customers through a network of some 2,000 specialist retailers throughout Europe, and increasingly in the USA and the Asia region.

Tisca Austria GmbH is a subsidiary company of the Tisca Group, the business activities of which are committed to turning rooms into places that are worth living in thanks to the possibilities offered by textiles.

Tisca Austria GmbH is based in Thüringen (Vorarlberg, Austria), while the headquarters of the corporate group are located in Bühler, Appenzell, Switzerland.
